

COMPANY OVERVIEW

Ground Engineering Contractors (GEC) Drilling & Grouting, Inc. is a geotechnical contracting company specializing in drilling and grouting services for the mining and heavy civil construction industries. GEC offers a wide variety of grouting services including contact grouting, consolidation grouting, pre-excavation grouting, chemical grouting, water cut-off, permeation grouting, grout curtains, etc. GEC has experience performing grouting with numerous grout types, allowing us to apply our grouting services to virtually all geologic settings. Drilling work is performed in support of our grouting operations as well as for other drilling applications. Much of our drilling work is performed on difficult access projects.

MINING RELATED SERVICES

Our typical mining related services include:

- Grouting for water cut-off applications
- Pre-excavation grout curtains for shafts and slopes/declines
- Shaft and slope/decline rehabilitation grouting
 - Contact and chemical grouting for water cutoff

- Concrete repair work in support of grouting operations
- Ground Improvement for shaft and slope/decline construction in overburden
- Sinkhole sealing and repair
- Asphalt grouting for major inflows
- Key Man and Equipment supply
- Emergency response drilling and grouting services
- Service contracts for drilling and grouting
- Exploratory drilling
- Bulkhead construction
 - Grout curtains for bulkhead construction
 - Contact grouting of bulkheads
- Tailings dam grout curtains
- Unique grouting applications for dealing with water and ground control issues
- Self-performance of mine support activities when required
- Drop hole drilling and grouting
- Infill grouting
